Quarterly Commentary - 1Q19

It is ubiquitous in the investment industry to use the word volatility to describe risk, and vice versa. But risk and volatility are not the same things. To Frontier, risk is the possibility of material or long-term loss of investors' money, whereas volatility is the normal random price changes – both positive and negative – that occur along an investors path. Risk is like a powerful wave causing sweeping damage, while volatility is more like ripples of price change on the surface of the water. The concepts may be similar, but not the same thing when it comes to real investors' money.

The last six months for capital markets price movements are a clear example of normal random volatility. In the 4th quarter of 2018, the S&P 500® Index – a broad measure of U.S. stock performance – lost 13.5%. As if on cue, we entered 2019 with an S&P 500® gain of 13.7%. The result: we just returned to where we started. There is no need for risk management – if you believe the passive indexing theory, that is.

The reality is that a 13.5% decline followed by a 13.7% gain results in a loss of money. An Individual who invested \$1 million in the S&P 500® Index on September 30 would have lost approximately \$16,500 over these two quarters. Why a 13.5% decline followed by a 13.7% gain results in a loss is not a mystery. It is because of the basic investment concept of geometric compounding. Losses result in fewer dollars invested over time, requiring more and more positive return to make up the difference. This is exactly why risk management has a material advantage – even during periods of volatility when it appears no damage has been done.

While risk management, or outperforming in poor market environments, has its advantages almost all the time, the incredibly strong first quarter, too, proved to be a very good relative quarter for Frontier investors. The combination of managing Frontier strategies below benchmark risk exposures and the security selection prowess of the mutual funds that comprise our strategies not only produced risk mitigating performance in the 4th quarter but also enabled most Frontier strategies to outperform benchmarks during the first quarter's blast-off recovery. This, as shown earlier, produces more dollars for investors through times of volatility – even during periods when steep declines are offset with equal gains, and when it seems like capital markets prices have not materially changed overall.

Asset allocation has a dramatic impact on short-term results and helps us manage downside risk at the appropriate level, but longer-term most of the added value on the return side comes from our mutual fund selection process. Fund performance continues to enhance returns for each strategy as the funds added value over indexes again in 2019's first quarter. Longer-term performance across strategies and across time-periods continues to be better than benchmark with few exceptions.

Past performance is no guarantee of future returns. Nothing presented herein is or is intended to constitute investment advice or recommendation to buy or sell any types of securities and no investment decision should be made based solely on information provided herein. There is a risk of loss from an investment in securities, including the risk of loss of principal. Diversification and asset allocation do not ensure a profit or protect against a loss. All performance results should be considered in light of the market and economic conditions that prevailed at the time those results were generated. Before investing, consider investment objectives, risks, fees and expenses. Information provided herein reflects Frontier's views as of the date of this report and can change at any time without notice. Other Expenses	\$0

Advisory fees are assessed according to the fee schedule in your Investment Advisory Agreement.

DEFINITIONS

1. **Benchmark** is provided so you can compare the performance of your portfolio to an index or combination of indices with approximately the same expected volatility level. The Benchmark is not actively managed and contains a limited number of asset classes. It is generally not possible to invest in an index and therefore they do not incur frictional costs. Your portfolio consists of actively managed funds, contains more asset classes than the Benchmark and its asset allocation is adjusted periodically.
2. **Account Value vs. Net Investment** shows your contributions and/or withdrawals in the account versus the market value of the account over the specified time period.
3. **Portfolio Performance** returns shown in this report are annualized unless the performance period is less than one year. Your portfolio performance is reported NET of fees, after deduction of the advisory fees and transaction costs as set forth in your Investment Advisory Agreement.
4. **Current Allocation** shows the asset allocation of your portfolio. When determining the asset allocation of your portfolio, each mutual fund in your portfolio is assigned to a single asset class even though most funds invest in more than one asset class. For example, an investment in a global equity fund is fully counted as an investment in international equity even though it may also invest in US equity. Funds that are counted as an investment in an asset class like Real Assets or Absolute Return may hold US or international equities or fixed income securities, but will not be counted as investments in those asset classes.
5. **Allocation Variance Over Time** shows changes to the asset allocation in your portfolio over the time period specified.
6. **Portfolio Growth Since Inception (Growth of \$100)** shows how \$100 invested in your portfolio has grown since its inception compared to \$100 invested in the portfolio's benchmark. This information is intended to help you understand and assess the historical performance of your portfolio.
7. **Net Contribution** is the net of contributions and withdrawals for the specified date period.
8. **Net Gain / (Loss)** is the difference between the beginning and ending values for the specified date period minus the Net Contribution for the specified date period.
9. **Time-Weighted Return** is a method used for calculating performance. The daily performance values are calculated based on the ending value, beginning value, and flow of each day. This return is stored and linked together to produce time-weighted returns.
10. **Partial Period Return** (*), indicated by the asterisk symbol, is a performance return that is not based on the entire reporting period shown. For example, the account inception date is in the middle of the return period reported. A **Linked Partial Period** (†), indicated by the dagger symbol, is a performance return where an account, category or fund return is calculated from all holding periods and then aggregated together (arithmetically linked).
11. **Inception to Date Risk vs. Return** shows the return and associated risk level of your portfolio compared to several common indices. Portfolios with more volatility have greater swings in value and are considered riskier, but usually also have a greater potential for gain. **Standard Deviation** quantifies the extent to which the actual annual returns of a portfolio deviate from the average of those annual returns over a given time period. Standard deviation is often used as a measure of risk because it shows the magnitude of the up and down swings in a portfolio's value. In general, the greater the standard deviation of returns, the greater the potential for upward and downward swings in value.

BENCHMARK COMPOSITION

The Benchmarks for the Long-Term Growth, Growth & Income, Balanced, Conservative and Capital Preservation strategies are combinations of the Wilshire 5000 Total Market Index, MSCI All Country World ex US Index, Bloomberg Commodity Index, HFRX Global HF Index, Barclays US Aggregate Bond Index (substitute the Barclays Municipal Bond Index for taxable accounts) and 3-Month T-Bills.

In order to better represent the asset classes Frontier was investing in at the time, the blends from January 1999 - April 2004, vary from those for the time period May 2004 - current. The blends of the indices for these two time periods are:

	Capital Preservation Bench	Conservative Bench		Balanced Bench	
	Jul 08 - Current	Jan 03 - Apr 04	May 04 - Current	Jan 99 - Apr 04	May 04 - Current
Wilshire 5000	10%	30%	15%	45%	30%
MSCI AC World ex US	0%	10%	5%	15%	15%
Bloomberg Commodity	15%	0%	15%	0%	10%
HFRX Global HF	25%	0%	25%	0%	20%
Barclays US Agg	40%	40%	40%	40%	25%
3M T-Bills	10%	20%	0%	0%	0%

	Growth & Income Bench		Long-Term Growth Bench	
	Jan 99 - Apr 04	May 04 - Current	Jan 99 - Apr 04	May 04 - Current
Wilshire 5000	60%	45%	70%	50%
MSCI AC World ex US	20%	20%	30%	30%
Bloomberg Commodity	0%	10%	0%	10%
HFRX Global HF	0%	15%	0%	10%
Barclays US Agg	20%	10%	0%	0%
3M T-Bills	0%	0%	0%	0%

Benchmarks for the Global Opportunities, Focused Opportunities, Absolute Return Plus, Absolute Return and Short Term Reserve strategies are the MSCI World, S&P 500, HFRX Global HF, HFRX Absolute Return and Barclays Capital 1-5 Year US Treasury Indices, respectively. The benchmark for the taxable Short Term Reserve strategy is the Barclays Capital 3 Year Municipal Index. In the case of indices that include foreign securities, index returns are still presented on a total return basis, but will be net of foreign taxes on income generated by these securities.

GLOSSARY OF INDICES

It is generally not possible to invest directly in an index* therefore they do not incur frictional costs. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index.

Barclays Capital 1-5 Year US Treasury: The index includes all publicly issued, US Treasury securities that have a remaining maturity of greater than or equal to 1 year and less than 5 years, are rated investment grade, and have \$250 million or more of outstanding face value. In addition, the securities must be denominated in US dollars and must be fixed rate and non-convertible.

Barclays Capital US Aggregate Bond: Measures the performance of the US investment grade bonds market. The securities must have at least one year remaining to maturity, must be denominated in US dollars and must be fixed rate, nonconvertible and taxable.

Barclays Capital Municipal Bond: The US Municipal Index covers the USD-denominated long-term tax exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Barclays Capital 3 Year Municipal: The Barclays 3 Year Municipal Index is a rules-based, market-value weighted index engineered for the long-term tax-exempt bond market. This index is the 3 year (2-4) component of the Municipal Bond Index.

Bloomberg Commodity: This is a broadly diversified index that allows investors to track commodity futures through a single, simple measure. The DJ-UBSCISM is composed of futures contracts on physical commodities.

Consumer Price Index: CPI is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. It is used as a measure of inflation and is calculated by the US Department of Labor Bureau of Labor Statistics.

HFRX Absolute Return: The HFRX Absolute Return Index is designed to be representative of the overall composition of the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage. As a component of the optimization process, the index selects constituents which characteristically exhibit lower volatilities and lower correlations to standard directional benchmarks of equity market and hedge fund industry performance.

HFRX Global Hedge Fund*: Represents the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage. The index is weighted based on the distribution of assets in the global hedge fund industry. It is a trade-able index of actual hedge funds.

MSCI All Country World ex US: The MSCI ACWI ex-USA is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI ex-USA consists of 44 country indices comprising 23 developed and 21 emerging market country indices. The developed market country indices included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom excluding the United States. The emerging market country indices included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Morocco, Peru, Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey.

MSCI World: A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 24 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.

S&P 500: Represents US large company stocks. It is a market-value-weighted index of 500 stocks that are traded on the NYSE, AMEX, and NASDAQ.

Three Month T-Bills: 3-Month T-Bills are a short-term debt obligation backed by the US government that serve as a proxy for money market instruments.

Wilshire 5000 Total Market: The Wilshire 5000 Index is an unmanaged individually market capitalization weighted index that represents the total dollar value of all common stocks in the US for which daily pricing information is available. The index consists of over 7,000 US-headquartered and traded issues, including common stocks, REITs, and limited partnerships, and excluding bulletin board issues.

INFORMATION PRESENTED IN THIS REPORT

This report provides information on all your investments held in the account(s) referenced above. Frontier manages your assets based on your investment objectives and goals as communicated to us by you or your financial advisor. Therefore, it is important for you to inform us or your financial advisor promptly anytime there is a change to your overall objectives and/or financial situation.

Past performance is no guarantee of future returns. There is no guarantee that your investment goals will be met and your account could lose value, including loss of principal. Diversification does not ensure a profit or protect against a loss. The performance results should be considered in light of the market and economic conditions that prevailed at the time those results were generated.

In accordance with Rule 206(4)-2(a)(2) under the Investment Advisers Act of 1940, Frontier urges and recommends clients compare all statements received from Frontier to those received directly from your custodian.

HOW TO OBTAIN ADDITIONAL INFORMATION ABOUT FRONTIER

You may obtain any of the following documents at any time without charge:

ADV Brochure. As a registered investment advisor, Frontier prepares and periodically updates an ADV Brochure that describes certain aspects of its business and investment processes.

Rules of Conduct. All employees of Frontier are subject to its Rules of Conduct, which establish certain standards of behavior and professional conduct.

Proxy Voting Policy. Frontier has a written policy designed to ensure that we vote proxies for our clients in a manner that is consistent with their best interests. You may also obtain information about how we voted proxies on your behalf.

Privacy Policy. Frontier has a policy designed to protect the privacy of client information. Frontier's Privacy Policy provides broad protection of all client information and allows for disclosure of such information only in very limited circumstances. The Privacy Policy is included on the following page.

To obtain any of this information, please contact us at:

Frontier Asset Management, LLC

PRIVACY POLICY

Facts: What does Frontier Asset Management, LLC do with your personal information?

Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?

The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- Social Security number and investment experience
- Account balances and transaction history
- Assets and income
- Personal contact information including email

When you are no longer our customer, we continue to share your information as described in this notice.

How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Frontier Asset Management, LLC chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Frontier Asset Management, LLC share?	Can you limit this sharing?
For our everyday business purposes— such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes— to offer our products and services to you	No	We do not share
For joint marketing with other financial companies	No	We do not share
For our affiliates' everyday business purposes— information about your transactions and experiences	No	We do not share
For our affiliates' everyday business purposes— information about your creditworthiness	No	We do not share
For our affiliates to market to you	No	We do not share
For nonaffiliates to market to you	No	We do not share
